super
FDW 10c-RE

+ Super misting fan having pressure pipe lines with 2500 lbs. heavy duty compressor to create dense mist to bring down outer temperature to 12° to 17° centigrade + Hirer is to provide 3000 liter potable water tank or direct water tap connection to run 12 super misting fans.

MISITING SYSTEMS & AIRCOOLERS

super MISTING SYSTEMS & AIR COOLER

PIPELINE MISTING SYSTEMS

Super Mist Line Systems

Super Mist Line System serves as outdoor misting system in which ordinary tap water is 4 stage filtered, pressurized and forced through nozzles to create an ultra fine 10-micron (about one-tenth the size of human hair) mist. The ultra fine mist flash from this water misting system evaporates upon contact with heat in the surrounding area, effectively reducing ambient temperature by as much as 10° Celsius.

Application Areas

Homes, Hotels and Resorts, For Pollution Control, Gardens and Orchards, Livestock and Poultry Farms, Sports Complexes, Shopping Malls and Multiplexes, Dairy & Agriculture Farms.

super **Air Cooler**
